A

A

main ()

Declare variables
float arRect1,
arRect2,length1,
width1,length2,
width2

Input to outputs
length1
width1
length2
width2

Formulas
arRect1
arRect2

B

B

Input data
arRect1
arRect2

arRect1==arRect2 — **True** → The area of the rectangles are equal to each other

arRect1>arRect2 — **True** → The area of rectangle1 is greater than rectangle 2

" " — **True** → The area of rectangle 2 is greater than rectangle 1

return 0
